

Waste is stupid / It can be done

It can be done by Dan Boding-Jensen, Vestforbrænding

It can be done / Leaving the desk

Thanks to DAIM

It can be done / I/S Vestforbrænding

19 municipalities 300 employees 1.000.000 tons (2.100.000) 1.200.000 million kroner

- 1. Environmental potential
- 2. Moving resources
- 3. From Shit(s) to HITs
- 4. Timing
- 5. Risk willingness
- 6. 3 mini projects
- 7. The desert
- 8. From storytelling to story living
- 9. An invitation

It can be done / There is no planet B

It can be done / Moving resources

It can be done /Hits

oldning = motivation

nformation = Information

eknologi = Technology

 $1.700 \times 1,4/24 = 99,-$

The orange feeling

It can be done /Timing

Holdning = motivation - Information - Teknologi = Technology

It can be done / risk willingness

Big well-established organisations will institutionalize their strategies and existing paradigms at a level that can be compared to a religion and because of that, express a strong unwillingness to change especially if the change/innovation is radical

Michael Porter (1998)

It can be done / The desert

From storytelling to storyliving / New projects

Changing the way VF is working – learning to make HITs

Making HITs on the way to Returnity

From storytelling to storyliving / Ways of working

Ways of working:

2009 - First anthropologist at VF

2010 – User driven education including fieldwork

2010 – New innovation strategy

Making HITs:

2009 www.affaldetsvej.dk

2010 Waste back to store project (Herlev)

2010 <u>www.dinsortering.dk</u>

2010 First order from a municipality demanding user driven methods (Herlev)

2010 New systems at private households

It can be done / An invitation
